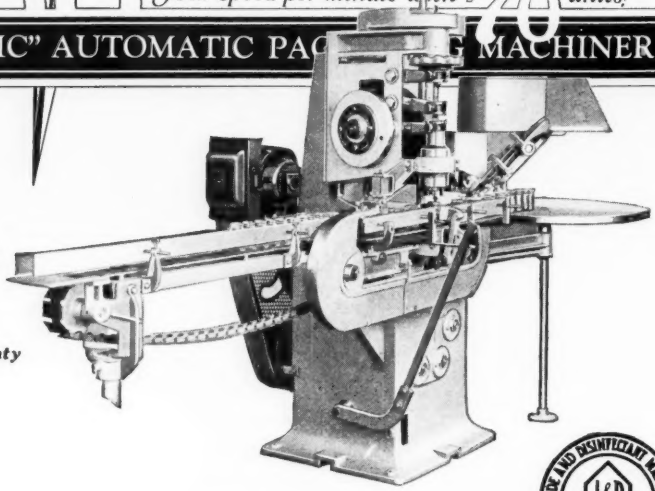
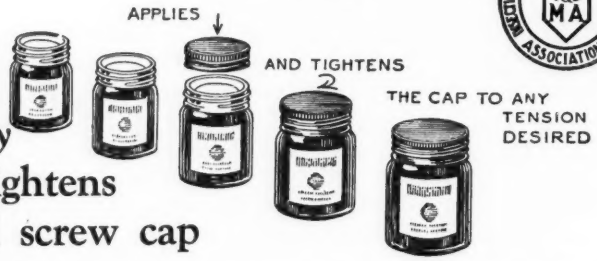
"PNEUMATIC" AUTOMATIC PACKAGING MACHINERY



SINGLE HEAD SCREW CAPPING ***Machine****

****One of the Seventy***



Automatically applies and tightens any standard screw cap

THIS MACHINE AUTOMATICALLY picks up a cap and puts it on the bottle, turns it to the desired tension, and delivers the closed bottle to a belt or table. It can be equipped with automatic cap feed if desired.

It embodies the principles used in our famous Six-head Capper, but employs a single head with straight line bottle feed. It is a self contained unit, and may be operated alone or in series with our Samco Jr. and other Vacuum Filling Machines.

Operates at any speed up to forty a minute. Handles Single or Divided Thread, Amerseal and Duplex Seal caps of any standard size. Adjustments for changing type and size made easily and quickly.

Send us your filled, sealed containers for precise information

We have developed 70 standardized packaging units, affording the most efficient and economical systems for filling and sealing of liquids, semi-liquids, and dry, free-flowing solids. Let us show you what we have—our preliminary service is made without charge.

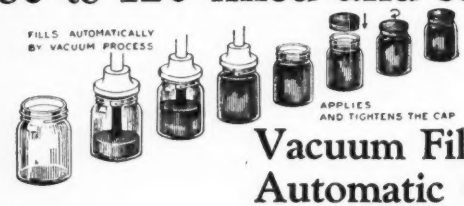
VACUUM FILLING AND AUTOMATIC CAPPING.*

***Two of the Seventy*

60 to 120 filled and sealed every minute



Vacuum Filling and Automatic Capping *combined!*

FULLY AUTOMATIC IN BOTH operations with speed to suit your production requirements.

Vacuum Filling

Models 1 and F Vacuum (Suction) Filling Machine, ten to twenty heads, receives glass or metal containers from belt and fills them to predetermined heights. Handles liquids or semi-liquids. No fumes, no after-drip or overflow; skips faulty containers automatically. Liquid not pumped or agitated.

Automatic Capping

This Six-head Capper applies and tightens standard and divided thread, Amer-Seal and Duplex Seal Caps to any tension required. Fully automatic; does not mar delicate cap finishes; delivers to belt or table.

The Unit System of Automatic Packing

is illustrated here. Two machines, each designed to operate alone or in sequence. This system permits of steady, economical growth. Write for full details and summary of our complete service embracing 70 units for liquid, semi-liquid, dry and semi-dry free-flowing materials.

"PNEUMATIC" AUTOMATIC PACKAGING MACHINERY

good reasons

70 Standardized Units forming complete Packaging Systems—filling, weighing, sealing, wrapping—for dry, free flowing materials, liquids, semi-liquids, and plastic substances.

15-30-60-120 per minute a constant speed attainment to meet your production requirements.

We design single machines for all packaging purposes. Backed by 35 years' experience—in touch with packaging requirements throughout the world—able and willing to take infinite pains to insure perfect results. Give us the knotty problem. We lay out packaging departments to take full advantage of space and power facilities.

and build all our machines. Enormous facilities in our plant at Norfolk Downs, the largest and most complete of its kind in the world. Each machine fully assembled and tested by *use* before shipping.

Install and Service anywhere on earth. Our men set up and operate our machines and train your operatives. We maintain a complete replacement part service that goes back 35 years.

These are reasons why we say
COME TO HEADQUARTERS

for any machine or system for automatic packaging. Let our engineers discuss the problem with you.

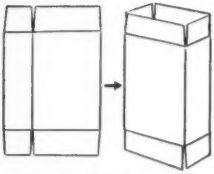
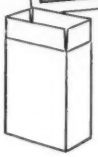
"PNEUMATIC" AUTOMATIC PACKAGING MACHINERY

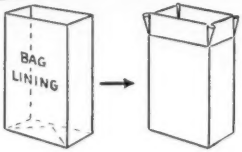
Come to HEADQUARTERS



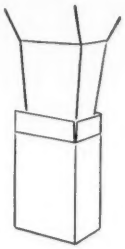
"Squaring" the Carton: This is done on the Carton Feeder, which opens and feeds to the Bottom Sealer.



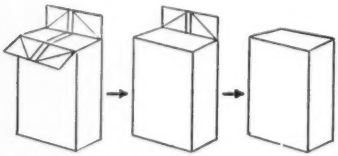
Bottom Sealing: done on Bottom Sealer. A code symbol or number can be stamped in the bottom flaps.



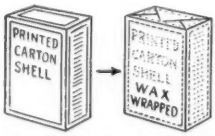
Lining the Carton: done on Carton Liner. Waxed or Parchment paper bag lining is formed, heat-sealed, and inserted in empty carton.



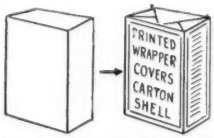
Filling and Weighing: This is done on a Net Weigher or on a Gross Weight Machine.



Top Sealing: done on Top Sealer. When lined carton is sealed the paper is interleaved with the flaps as shown.



Wax Wrapping: done on Wax Wrapper, which applies and heat-seals a transparent waxed paper.

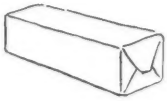


Tight Wrapping: done on Tight Wrapper, which applies a printed paper wrap to the carton shell.

Vacuum Filling with any liquid or semi-liquid. No agitation, overflow or after drip.

Automatic Capping: any standard screw cap, single or divided thread, Amerseal or Duplexseal, *applied and tightened automatically.*

"Pneumatic" Tea Balls: superior pouch type made automatically of pure gauze and thread. Identifying tag tied on at same time.



Butter cut and wrapped automatically. No broken grain, negligible moisture loss or shrinkage; uniform size, quality and wrap.

These operations are accomplished with Pneumatic Automatic Packaging Systems, comprising independent co-ordinated units at constant production speeds to meet your requirements. *Come to Headquarters* for your packaging department equipment. Our engineers are at your service.

Aim for prosperity with CHEMICAL CONTROL

PROFITS are uncertain where manufacturing processes are shaped by precedent, rule of thumb, trial and error or snap judgment. The chemist, the chemical engineer and the executives wise enough to employ them are reshaping industry. New ways of producing old products, new products to produce, converting waste into value, finding or creating new materials . . . these and countless other achievements are making startling changes. They can do it for you as well as for your competitors. How they do it and with what kind of materials, equipment, machinery and supplies, will be an open book to the thousands of technical men and industrial executives who visit the Twelfth Exposition of Chemical Industries at Grand Central Palace, New York, May 6th to 11th.

Leading manufacturers will display their latest and best. With specialists in attendance to discuss your own interests.

Call it an engagement—write it on your calendar — come and bring your associates

The DUODEK SOAPER

30 years on the market now a New Improved Model

1. LOW IN PRICE—STURDY—NEAT APPEARANCE.
2. CANNOT LEAK, CLOG OR GET OUT OF ORDER.
3. GLASS GLOBE VERY THICK AND CLEAR—NEARLY UNBREAKABLE
4. METAL PARTS GUARANTEED 5 YEARS

On account of the thoro satisfaction and low cost of the new improved Duodek Soaper many liquid soap manufacturers lend Duodek Soapers to their customers Gratis or at a very small permanent rental charge thereby helping to assure repeat orders on the liquid soap.

CLIFTON CHEMICAL COMPANY, Inc.
Clifton Bldg. 246 Front St. New York

It's easier to get re-orders with CLIFTON products!

CLIFTON LIQUID SOAP SYRUP

A concentrated product that makes a fine liquid soap by merely adding 2 to 3 times as much plain hydrant water. A time saver.

CLIFTON LIQUID SOAP BASE

A pure cocoanut oil base—clear as a crystal and so concentrated you can hardly dig your finger in it. Makes up a soft, velvety liquid soap at a low cost.

TILTYPE LIQUID SOAP DISPENSER

A fool-proof tilting dispenser which has no detachable parts to get tampered with or lost. May be filled more rapidly than any other known container.

DUODEK LIQUID SOAP DISPENSER

A push up type dispenser which functions entirely by gravity. No screws, springs or intricate parts to get clogged up or out of order. Guaranteed 10 years.

CRESOLENE DISINFECTANT

A coal tar disinfectant having a coefficient of 2/3, other strengths can be supplied also up to 14/16.

PINO CLEANSER

A concentrated liquid soap made from vegetable oil with the addition of fragrant pine oil. Recommended for varnished or painted surfaces or where a bland neutral cleanser is required.

METEOR OIL SOAP

A vegetable oil jelly soap for all varnished and painted surfaces. It is made up according to specifications of U. S. Bureau of Standards. Also used extensively for hospital and surgical purposes.

PINE-TREE DEODORANT

A non-poisonous deodorant, cleanser and disinfectant of an oxygenated pine base. Pale amber in color—gives a milk white emulsion in water.

Also—CRESOL COMPOUND, INSECTICIDE, THEATRE SPRAY, ETC., ETC.

Let us know what you use or are interested in. We'll gladly send samples and prices. Direct shipments under your own label if desired. A promise—You will find it easier to get re-orders with Clifton Products. (others do.)

DEODORETTE

the New, Better URINAL CAKE!

With stronger more fragrant perfumes. Four delightful odors. Criss-cross allows cake to be broken in four equal parts.

Packed 1 dozen 3 ounce cakes to the tube, assorted or solid odors, under your own label, if desired.

CLIFTON CHEMICAL CO., INC. CLIFTON BLDG., 246 FRONT ST., NEW YORK CITY

It's easier to get re-orders with CLIFTON products!

CLIFTON LIQUID SOAP SYRUP

A concentrated product that makes a fine liquid soap by merely adding 2 to 3 times as much plain hydrant water. A time saver.

TILTYPE LIQUID SOAP DISPENSER

A fool-proof tilting dispenser which has no detachable parts to get tampered with or lost. May be filled more rapidly than any other known container.

CRESOLENE DISINFECTANT

A coal tar disinfectant having a coefficient of 2/3, other strengths can be supplied also up to 14/16.

METEOR OIL SOAP

A vegetable oil jelly soap for all varnished and painted surfaces. It is made up according to specifications of U. S. Bureau of Standards. Also used extensively for hospital and surgical purposes.

CLIFTON LIQUID SOAP BASE

A pure cocoanut oil base—clear as a crystal and so concentrated you can hardly dig your finger in it. Makes up a soft, velvety liquid soap at a low cost.

DUODEK LIQUID SOAP DISPENSER

A push up type dispenser which functions entirely by gravity. No screws, springs or intricate parts to get clogged up or out of order. Guaranteed 10 years.

PINO CLEANSER

A concentrated liquid soap made from vegetable oil with the addition of fragrant pine oil. Recommended for varnished or painted surfaces or where a bland neutral cleanser is required.

PINE-TREE DEODORANT

A non-poisonous deodorant, cleanser and disinfectant of an oxygenated pine base. Pale amber in color—gives a milk white emulsion in water.

Also—CRESOL COMPOUND, INSECTICIDE, THEATRE SPRAY, ETC., ETC.

Let us know what you use or are interested in. We'll gladly send samples and prices. Direct shipments under your own label if desired. A promise—You will find it easier to get re-orders with Clifton Products. (others do.)

The New Improved Tiltype Soaper

1. NO DETACHABLE PARTS—FOOLPROOF
2. NO SPECIAL KEYS OR LOCKS.
3. MOST EASILY FILLED LIQUID SOAP DISPENSER ON THE MARKET.

TO FILL, MERELY PRESS FUNNEL (FURNISHED WITH EACH MACHINE) IN THE OPENING WHICH PRESSES BACK A SMALL BALL INSIDE ALLOWING SOAP TO ENTER FREELY.

Once installed in your customer's place the Tiltype Soaper will give 100% service year in and year out. There's nothing to get out of order. Cannot get clogged up. Helps you sell more liquid soap.

The DUODEK SOAPER

10 years on the market now a New Improved Model

1. LOW IN PRICE—STURDY—NEAT APPEARANCE.
2. CANNOT LEAK, CLOG OR GET OUT OF ORDER..
3. GLASS GLOBE VERY THICK AND CLEAR—NEARLY UNBREAKABLE
4. METAL PARTS GUARANTEED 5 YEARS

On account of the thoro satisfaction and low cost of the new improved Duodek Soaper many liquid soap manufacturers lend Duodek Soapers to their customers Gratis or at a very small permanent rental charge thereby helping to assure repeat orders on the liquid soap.
